 LinkedIn

Full-Stack AI Engineer building production-ready AI applications, multi-stage LLM workflows, research automation, and SaaS platforms. Experienced with real-time streaming, background jobs, secure authentication, billing, and evidence-backed systems using React, Next.js, FastAPI, Node.js, PostgreSQL, and MongoDB.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL | **Frontend:** React, Next.js, Tailwind CSS, Framer Motion | **Backend:** FastAPI, Node.js, Express.js, REST APIs, SSE, background workers | **AI:** Gemini, Groq, OpenAI API, LLM orchestration, structured outputs | **Data & Tools:** PostgreSQL, MongoDB, Drizzle ORM, Stripe, Git, Sentry, PostHog

PROJECTS

LeadLens – AI-Powered Prospect Intelligence SaaS

[Live](#) | [GitHub](#)

Tech Stack: Next.js 16, React 19, TypeScript, Neon PostgreSQL, Drizzle ORM, Express, Gemini, Groq, Stripe

- Designed and deployed a multi-tenant SaaS that converts public prospect websites into evidence-backed sales briefs, fit scores, service recommendations, outreach, call preparation, and proposal direction.
- Architected a 14-stage asynchronous pipeline using PostgreSQL transactional job claiming, persistent stage state, stale job recovery, retries, Gemini key/model rotation, Groq failover, and source verification.
- Built agency-specific opportunity scoring by combining website evidence and PageSpeed signals with ICP criteria, service catalogs, pricing, and relevant case studies.
- Implemented Argon2id authentication, organization-level authorization, Stripe billing, SSRF-safe crawling, observability, report versioning, and multi-format exports.

NeuroScout AI – Autonomous Research Assistant

[Live](#) | [GitHub](#)

Tech Stack: React 19, FastAPI, Python, Google Gemini, MongoDB, SSE, DDGS, HTTPX, BeautifulSoup

- Built a full-stack research assistant that plans investigations, searches the live web, extracts evidence, identifies coverage gaps, and generates cited reports.
- Streamed research progress via SSE to React and stored sessions and reports in MongoDB.
- Developed a 12-point quality validation pipeline with targeted repair passes for report structure, causal reasoning, source quality, and missing evidence.
- Implemented configurable research modes, iterative follow-up searches, multi-key Gemini fallback, automated tests, metrics, and report exports.

CareerByAI – AI-Powered Career Platform

[Live](#) | [Frontend](#) | [Backend](#)

Tech Stack: React, Node.js, Express.js, MongoDB, Google Gemini AI, PDF.js

- Deployed CareerByAI with sub-250ms page load on Vercel CDN.
- Developed an AI-driven platform for personalized career roadmaps and job matching using Gemini AI.
- Implemented CV parsing with automated skill extraction via PDF/TXT analysis.
- Designed a custom job-fit algorithm based on skill, experience, and role alignment.
- Integrated chatbot-style AI guidance with curated learning resources and secure JWT authentication.
